

Open Call for Fellowship Applications-2023 (**ONLY for the Current Chemistry Student, SUST**).

The Education, Science, and Innovation Alliance (ESIA) is accepting fellowship applications for 2023. This opportunity is for those who are currently studying Chemistry, at SUST. Fellowships will be offered in four different categories: **1. Academic excellence 2. Academic excellence (Female) 3. Community Leadership, and 4. ESIA Feature Fellowship.** Masters and 1st-year 1st-semester students will not be considered for these fellowships. **The ESIA will provide 25,000/- Taka and a Certificate for each recipient.**

About Education, Science, and Innovation Alliance (ESIA)

ESIA is a non-profit organization based on North America, dedicated to nurturing education, science, and innovation among talented young individuals who require additional assistance to achieve their career aspirations. ESIA is primarily formed by former students from the Department of Chemistry, Shahjalal University of Science & Technology (SUST). However, some individuals outside SUST also show interest to get involved in ESIA's mission. Generous contributions from individuals will play a crucial role in offering the essential financial and emotional backing to uphold the organization's mission and vision. It's important to note that ESIA is driven solely by its commitment to fostering growth of underrepresented/underprivileged young students and does not harbor any undisclosed political, racial, or religious agendas.

Applications will be accepted until **September 30, 2023**. One single pdf file that contains all the application materials should be forwarded to esialliance2020@gmail.com.
